

# Granular Transfer

*for everyone*

Move any number of beans from one container to another.

Do this as many or as few times as you want.

Move the containers around the space.

## *Options*

Provide other containers (bags, bottles, cups, boxes...).

Ask for or offer help, suggest actions, or interrupt other people's actions.

Use tubes or funnels to assist in transfer.

Combine this score with *Consensus* (see over).

## *Guidelines*

Aim for containers rather than the floor. If you make a mess, clean it up.

Take any number of beans home, but be sure to wash them before cooking.

## *Preparation*

Bring:

- copies of printed score
- plenty of one or many types of dry beans, peas, lentils
- containers, funnels, and tubes of various sizes/shapes/materials

Distribute:

- scores by either handing out or posting
- empty and full (of beans) containers around the space

Decide how/when to bring the piece to a close and gather materials.

-Jennie Gottschalk (January 2020)

(See other side for main instructions. This is a score you may decide to play alongside *Granular Transfer* with one or more other participants. Talking is both fine and necessary for this piece.)

*Consensus (for two or more people)*

Decide together on a sounding activity

    consider available resources (time, instruments, environment, etc.)

Make it happen

At anyone's prompting, stop and discuss adjustments

Try it again

-Jennie Gottschalk (August 2016)
